Gripwax Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth. Check with TOKO for updated kick wax recommendation.

Structure: A fine linear structure covered by one pass with the fine-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

**Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.**
