

WAX RECOMMENDATION **TOKO**[®]

High School Lynx Loppet Classic

Friday, December 12

Kincaid Park, Anchorage, AK

5K Classic 4X Interval start beginning at 12:30

Forecast/Conditions: Thursday night, lows 5-10 above. Friday highs 15-20. Six inches of new snow fell Wednesday. The course will be in great shape. Snow will be cold and abrasive race day morning.

Glidewax: Apply LF Moly/LF Blue 1:1, scrape and brush. Then apply HF Blue, scrape and brush out well. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush, and buff with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper. Iron in Base Green Binder. Cover with 3 thin layers of Carbon Gripwax Blue and a thicker layer underfoot only. If warmer, cover the Blue with Viola or even Red for most kick. Cork between applying layers. Check at the TOKO tent for the best grip wax recommendation.

Structure: Universal cold linear or one pass with Toko Structurite on Coarse Linear before applying Jetstream.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
