

WAX RECOMMENDATION TOKO[®]

Besh Cup #2 Junior Olympic Qualifier

Beach Lake Trails, Chugiak, AK

Sunday, December 21

11 A.M.

1K-10K Classic, J6-J1 and older

Mass Start

1 lap

Forecast/Conditions: Saturday night, partly cloudy, lows in the teens. Sunday, lows in the teens and highs in the 20's. The snow is old and dry and has been groomed several times.

Glidewax: Apply LF Moly, scrape and brush, then apply LF Blue and Nordlite X-cold Powder, iron in together, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper. Iron in Carbon Base Wax Green. Check at the TOKO tent for updated grip wax recommendation.

Structure: A fine linear structure, covered by one pass with the fine-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
