

WAX RECOMMENDATION

Town Series Classic Sprints

Birch Hill, Fairbanks, AK

Saturday, Dec. 5

11 A.M.

Classic Sprint

.5K kids, 1.25K adult

Heats

Forecast/Conditions: Overnight low 0F, temperature at kids' start 20, adults' start 30. Mostly cloudy. Transformed dirty snow, with a lot of tree debris on the track.

Glidewax: Apply LF Moly, scrape and brush. For early heats, apply HF Blue/HF Red mixed 1:1, scrape and brush. For later heats, use HF Red after the LF Moly. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Check at the Toko Table in the stadium for updated grip wax recommendation as the day goes on.

Structure: A fine linear structure will best suit these conditions. Dirty snow and tree debris will slow skis with additional structure.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
