

# WAX RECOMMENDATION

## Tahoe Rim Tour and Race

Tahoe City to Northstar, Tahoe City, CA

Sunday, January 24

9 A.M. 30K Classic, 9:30 A.M. 30K Skate

Mass start

Point-to-point

Forecast/Conditions: Saturday low of 16 with high of 26; 30 percent chance of snow showers. Sunday low of 13. Race start temperature near 20 with high of 26. Mostly cloudy. Expect soft tracks and powdery snow. Most of the race climbs up so expect colder, drier snow for middle 2/3 of the course.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red/HF Blue 2:1, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2 layers of Carbon GripWax Blue, followed by 3 layers of Carbon Gripwax Viola, corking between layers.

Structure: A soft ski with fine linear grind covered by one 'light' pass with the Red TOKO Structurite tool (or old fine linear wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
