

WAX RECOMMENDATION

Paco's XC President's Cup

Tahoe Donner XC Centre, Truckee, CA

Monday, February 15

10 A.M.

15K Skate (7K for Juniors)

Wave Start

1 lap

Forecast/Conditions: Sunday low of 22 with high of 39. Mostly clear. Monday low of 23, race start 30, with daytime high of 40. Mostly clear. Expect firm tracks and clean snow. Snow is generally colder in the middle 1/3 of the race.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad. Helx Red (or old Helx Warm) would be a super addition to, or substitution for, Jetstream.

Gripwax: N/A.

Structure: A Medium flex ski with linear grind covered by one pass with the Toko Red Structurite tool (old medium offset wheel) after JetStream or Helx application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
