

WAX RECOMMENDATION

Mammoth Marathon

Tamarack XC Center, Mammoth Lakes, CA

Sunday April 6

9:00 am

42K, 21K or 10K Freestyle

Forecast/Conditions: Insider Tip: This course is High Elevation and seems to hold up well. Lots of shady and protected trail. Don't wax too warm. Saturday Low 22F, High 40F, partly Cloudy, transforming snow with possible 'fresh' mixed in. Sunday Low 24F, Race 28-30F, High 35-38F; mostly cloudy with 20% chance of Snow Showers.

Glidewax: Apply LF Moly scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Moly, brushing with a dedicated nylon polishing brush, and finally, polish with a thermopad. HelX Warm would make an excellent alternative.

Gripwax: NA

Structure: A fine linear structure, covered by one pass with the coarse-broken wheel of a TOKO structurite tool, followed by one pass with the coarse linear wheel, (before JetStream application) will best suit these conditions.

Racing - Service

Check the Waxtip page at www.TokoUS.com before all of your races for the latest waxing information.

The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (HelX, JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red, Blue). Additionally, for those who do not have a rotocork (for applying JetStream), this step can be replaced by vigorously corking with a dedicated Plasto Cork at the expense of durability.
