

WAX RECOMMENDATION **TOKO**[®]

Snow Mountain Stampede

YMCA of the Rockies, Granby, CO

Saturday, February 28

9:50 A.M.

21K/42K Skate or Classic

Mass start

21K loop

Forecast/Conditions: Overnight low 5, Saturday high of 32. Partly cloudy, with 30 percent chance of snow Thursday and Friday.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply several layers of Carbon GripWax Viola, corking between layers.

Structure: A medium stonegrind covered by one pass with the coarse-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
