

WAX RECOMMENDATION

CRESTED BUTTE CITIZENS SERIES

Crested Butte Nordic Center, Crested Butte, CO

Saturday, Dec. 12

10 A.M.

10K Classic - Note Change!

Mass start

Forecast/Conditions: Overnight low 8F; temperature at start maybe up to 12F but the snow temperature will warm up slowly and remain cold and dry at start. New snow means track will likely still be soft.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. For fastest finish, rotocork JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in very thin layer Carbon BaseWax Green, cork smooth, let cool. Then apply 2 layers of Carbon GripWax Mint, corking between layers; carry with you to the start Carbon White for possible cover with 1-2 layers if needed.

Structure: Use your coldest grind skis. Or apply a fine linear structure covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
