

WAX RECOMMENDATION

Owl Creek Chase

Snowmass to Aspen, CO

Sunday, February 14

11 A.M.

21K Freestyle

Wave Start: Elite Men, Elite Women, & Citizen

<http://owlcreekchase.aspenrecreation.com/>

Forecast/Conditions: Overnight low 13, temp at start 27, dry cold snow, partly cloudy. Probably some light new snow within the 24 hours before the race. First half of the course will be cold and hilly. Middle course has multiple road crossings which usually are dirty. Note: This year has a different finish (at the high school), which remains considerably colder and drier than last year's finish site.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue/HF Red mixed 1:1, scrape and brush. Thorough brushing will help reduce dirt accumulation at road crossings. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a dedicated thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2 layers of Carbon GripWax Viola, corking between layers.

Structure: Fine grind - Boulder Nordic Sports ZR1 or 1 pass with the Blue Structurite tool (prior to JetStream application).

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
