

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## CRESTED BUTTE CITIZENS SERIES

CB MT Resort ALPINE TRAILS, Crested Butte, CO

Saturday, Dec. 5

9 A.M. at base of Red Lady Chair

8K Classical

Climb warming house hill, past terrain park, up

Houston to Red Lady chair, then reverse back down!

Forecast/Conditions: Overnight low -10F; temperature at start maybe up to 0F; Cold, dry manmade snow. **NOTE: NO classical track.** Last year skiers split between kick wax, no-wax skis and skate skis with kicker skins

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2 layers of Carbon GripWax Mint corking between layers. Cover with 1-2 layers of Carbon GripWax White, or even thin layer of Blue under forefoot to help get you up the 4K climb to the Red Lady Chair. This course is all about the kick and the long fast downhill to the finish won't be affected much by your kick wax!

Structure: Use your coldest grind skis. Or apply a fine linear structure covered by one pass with the fine-linear wheel of a TOKO structurite tool (before JetStream application).

Racing - Service

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
