

WAX RECOMMENDATION

Leadville Loppet

CMC Timberline Campus, Leadville, CO

Sunday, February 28

10 A.M. Start

44K/22K/10K Skate/Classic

Wave start based on distance

The course is essentially out and back for the 44K distance.

<http://www.mineralbelttrail.com/reports/2010LoppetEntryForm.pdf>

Forecast/Conditions: Overnight low of 12 and predicted temperature of 21 at race start. Cloudy skies with a 50 percent chance of snow showers. The mineral belt trail section will be well groomed, but expect very soft conditions in the CMC trail system.

Glidewax: Apply LF Moly , scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2-5 very thin layers (depending on race distance) of Carbon GripWax Blue, corking between layers.

Structure: A fine linear grind covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
