

# WAX RECOMMENDATION

## Steamboat Stampede

Steamboat Ski Touring Center, Steamboat Springs, CO

Saturday, January 16

9:25 A.M. 42K Classic

9:45 A.M. 42K Skate

Mass start

4 loops of 10K

Forecast/Conditions: Overnight low of 10, warming rapidly to the low to mid 20s for both starts. Expect partly cloudy skies and a high of 28 - 32 by finish. The track will be "Colorado" firm with a mixture of colder snow in the shade of the Fish Creek climb and transformed faster snow in the flats of the golf course sections.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue/HF Red mixed 1:1, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 6-8 very thin layers of Carbon GripWax Blue, corking between layers. You may consider adding in several layers of Viola for the long sunny climb back to the lap/finish line later in the race.

Structure: A fine linear structure covered by two passes with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application will best suit these conditions.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
