

WAX RECOMMENDATION

25th Annual Governor's Cup

Devils Thumb Ranch, Tabernash, CO

Saturday, January 21

Noon

30K/17K/5K Skate and Classic

Wave starts

www.devilsthumbbranch.com/index.cfm/cdid/11812/pid/10264

Forecast/Conditions: Overnight low 13-19 degrees, some new snow earlier in the week around 4-6 inches. A couple inches of snow is forecast for Friday. The trails are in good condition with a packed base around 6-8 inches.

Glidewax: Apply LF Moly/LF Blue mixed 1:1, scrape and brush, and then apply HF Blue/HF Red mixed 1:1, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 thin layers of Nordic GripWax Blue. Build these layers by pyramiding them toward the center, under your toe.

Structure: A fine linear structure covered by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
