

WAX RECOMMENDATION

Cote Dame Marie Ski Loppet

Hansen Hills, Grayling, MI

Saturday, January 21

10 A.M.

30K/15K Skate

Wave start

<http://www.graylingnordic.com>

Forecast/Conditions: A few inches of new snow accumulation is expected on Friday afternoon and evening with temperature falling to single digit F overnight. Expect temperature to rise into the low teens by race time Saturday. Expect a mix of firm and medium trail with some thin icy sections.

Glidewax: Apply a 1:1 mix of LF Moly/LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A cold grind followed by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
