

WAX RECOMMENDATION

MI Cup 6 Hour Team Relay

Hansen Hills, Grayling, MI

Saturday, January 7

10 A.M.

Skate or Classic, 5K - 7K Loop

Forecast/Conditions: We expect a well-packed track with some possible thin or dirty spots. Friday evening temperature is expected to dip into the high 20s with temperature around 30 at 10 A.M. and rising to 33 at 4 P.M. Expect mostly cloudy skies with a chance of snow.

Glidewax: Apply LF Moly, scrape and brush, then apply a mix of HF Red/HF Moly, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply alternating layers of Nordic GripWax Yellow and Nordic GripWax Red (finishing with Red), corking between layers.

Structure: A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
