

WAX RECOMMENDATION

24 Hours of Telemark

Telemark Resort, Cable, WI

Saturday, January 10, though Sunday, January 11

10 A.M. mass start

24hr, 12hr, 6hr & 3hr Races, Skate or Classic

Multiple Laps

Forecast/Conditions: Fresh snow in the days leading up to the event will be machine worked and packed. Expect firm conditions. Friday night low of zero F. Saturday expected high is 9. Saturday night low of -5 F rising to single digits by the 24 hour race finish. Snow expected during the race.

Glidewax: Due to the low temperatures and long race duration, apply LF Blue, scrape and brush, then apply LF Blue/LF Moly (1:1 mix) scrape and brush, then apply HF Blue with X-Cold Powder, scrape and brush. Finish by ironing in JetStream Blue, brushing with a dedicated nylon polishing brush, and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper. Iron in Carbon BaseWax Green, smooth with a cork, let cool. Apply 2-3 layers of Carbon GripWax Mint, cork smooth. Re-apply as needed during event.

Structure: A very fine linear structure, covered by one pass with the fine-linear wheel of a TOKO structurite tool before HF Blue application, will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
