

WAX RECOMMENDATION **TOKO**[®]

Giants Ridge Invitational - Classic Race

Giants Ridge Golf and Ski Resort, Biwabik, MN

Saturday, January 10

10 A.M. Boys

11:15 A.M. Girls

Interval start (Paired 30-second)

5K Classic, single lap of Silver Course

Forecast/Conditions: Fresh snow in the days leading up to the event should be machine worked and packed into a very firm track. Overnight low of -4F rising to near zero at start. Clear skies and sunshine during the race, but tracks should not glaze significantly.

Glidewax: Due to the extreme cold, the base needs extra hardness. Apply LF Blue, scrape and brush, then apply LF Blue/LF Moly (1:1 mix) scrape and brush, then apply HF Blue with X-Cold Powder, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush, and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper. Iron in Carbon BaseWax Green, smooth with cork, let cool. Apply 2-3 layers of Carbon GripWax Mint and cork smooth. Those requiring more kick should apply a short layer of Carbon White.

Structure: A very fine linear structure, covered by one pass with the fine-linear wheel of a TOKO structurite tool before JetStream application, will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
