

# WAX RECOMMENDATION

## Coca Cola Classic

Andes Tower Hills Trails, Alexandria, MN

Saturday, January 17

15K Skate

11 A.M.

Forecast/Conditions: Expect a machine worked track after extremely cold temperatures earlier in the week. Temperatures Friday night are expected to get down near zero F. Race time temperatures should around 10.

Glidewax: Apply LF Moly/LF Blue mixed 1:1, scrape and brush. Then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A fine linear structure covered by one pass with the fine-linear bit of a TOKO structurite tool before the JetStream application will best suit these conditions.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
