

WAX RECOMMENDATION **TOKO**[®]

Snekkevik Ski Event

Nine Mile Forest, Wausau, WI

Saturday, January 17

9:30 A.M., 12K Classic

10:30 A.M., 6K Skate

11 A.M., 12K Skate

Mass Start

Forecast/Conditions: Fresh snow in the days leading up to the event should be machine worked and packed into a very firm track. Overnight low of -3°F rising to between zero to 10°F for all starts. Partly cloudy skies with a chance of snow during the race.

Glidewax: Due to the extreme cold, the base needs extra hardness. Apply LF Blue, scrape and brush, then apply LF Blue/LF Moly mixed 1:1, scrape and brush. Apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush, buff with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper. Iron in Carbon BaseWax Green, cork smooth, let cool. Apply 2-3 layers of Carbon GripWax Mint and cork smooth. Those requiring more kick can use Carbon White.

Structure: A very fine linear structure will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
