

WAX RECOMMENDATION **TOKO**[®]

Iola Norseman Challenge

Norseman Hill Ski Complex, Iola, WI

Sunday, February 1

9:30 A.M, 10K Classic, mass start

Noon, 18K Skate, mass start

Forecast/Conditions: Mostly cloudy overnight with a low around 20. Race time temperature steady for first start and rising to 26 for the second start. Expect a machine worked and packed trail.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Apply 2-3 layers of Carbon GripWax Blue, corking between layers. Those needing more grip should use Carbon Violet.

Structure: A fine linear structure covered by one pass with the fine-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
