

WAX RECOMMENDATION **TOKO**[®]

ABR Spring Race

ABR Trails, Ironwood, MI

Sunday, March 15

8:54 A.M.

19K Freestyle

Handicap wave start

Forecast/Conditions: Mostly clear overnight, with a low around 23. Race time temperature 30 to 35 with partly cloudy skies and light wind. Expect machine-worked trail to pull colder snowpack to the surface and set into a firm track.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red and JetStream Yellow together, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2-3 layers of Carbon GripWax Red and cork smooth. Those needing more kick should apply Carbon Yellow.

Structure: A universal linear structure will best suit these conditions. Add one pass with the fine broken bit of the Toko Structurite if moisture becomes perceptible at the trail surface.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
