

# WAX RECOMMENDATION

## Baker Park Training Race

Baker Park Reserve, Maple Plain, MN

Saturday, January 10

9 A.M.

10K/20K Skate

1/2 laps

Forecast/Conditions: Overnight low 5F, temperature at start 6F, slight chance of snow overnight. Otherwise hard and firm snow.

Glidewax: Apply LF Moly/LF Blue mixed 1:1, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush, and polish with a thermopad.

Gripwax: NA

Structure: Fine stone grind or one pass with the fine-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
