

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **Honey Bear Classic**

Big Bay Pathway, Big Bay, MI

Saturday, February 28

Noon

15K/30K Classic

Mass start

Forecast/Conditions: Expect recent snowfall machine worked and packed into a firm track due to overnight lows reaching 5F. Race start temperature near 15F, rising during the race. Tracks will likely glaze due to the proximity of Lake Superior.

Glidewax: Apply LF Blue/LF Moly mixed 1:1, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2-3 layers of Carbon GripWax White, corking between layers. Those requiring more kick can use Carbon Blue.

Structure: A fine linear structure will best suit these conditions.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
