

WAX RECOMMENDATION **TOKO**[®]

Lumberjack Jaunt

Northland Arboretum, Baxter, MN

Sunday, January 25

6K/16K Classic, 11 A.M.

6K/16K Skate, Noon

1 loop for the 6k events, 3 loops for the 16k events

Forecast/Conditions: Expect a hard-packed course with firm classic tracks. Saturday night low near -20. Sunday mostly sunny, race time temps in mid-single digits below zero.

Glidewax: Apply LF Blue scrape and brush. Apply a LF Blue/LF Moly mixed 1:1, scrape and brush. Then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper. Iron in Carbon BaseWax Green, cork smooth, let cool. Then apply several layers of Carbon GripWax Mint, corking between layers. Those needing extra kick should use Carbon White.

Structure: A cold stonegrind will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
