

WAX RECOMMENDATION **TOKO**[®]

Minnesota Finlandia

Buena Vista Ski Area, Bemidji, MN

Saturday, February 14

10 A.M., 25K Classic and 25K pursuit (duathlon)

10:30 A.M., 25K/50K Skate

Wave start, two laps for 50K

Forecast/Conditions: Expect a firmly packed course consisting of icy, granular snow. Friday evening low near zero. Race temperatures of 5 to 10. Mostly sunny.

Glidewax: Apply LF Moly/LF Blue mixed 1:1, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply multiple layers of Carbon GripWax Mint, corking between layers. Those who desire more kick can use Carbon White. If tracks glaze use Carbon Yellow.

Structure: A fine linear structure covered by one pass with the fine-linear wheel of a TOKO structurite tool before JetStream application will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
