

WAX RECOMMENDATION TOKO®

Pre-Loppet

Theo Wirth Park, Minneapolis, MN

Sunday, January 4

10 A.M.

15K freestyle

Mass start, begins at Wirth Lake

Forecast/Conditions: Expect a firm, icy base underneath a few inches of recently fallen snow. Part of the race course (2K) is over the man-made loop, where conditions are excellent. Saturday evening lows and race time temperatures around 10. Snow likely Saturday evening and cloud cover Sunday around 50 percent.

Glidewax: Apply LF Moly/LF Blue mixed 1:1, scrape and brush. Apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush, and polish with a thermopad.

Structure: A fine linear structure, covered by one pass with the fine-linear wheel of a TOKO structurite tool before JetStream application, will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
