

WAX RECOMMENDATION

CXC Skiing SuperTour at Telemark

Telemark Lodge, Cable, WI

Saturday, January 31

9 A.M., Women 5K Classic, interval start, 1 lap

11 A.M., Men 10K Classic, interval start, 2 laps

2 P.M., J2/HS/Citizens 5K Classic, interval start

Forecast/Conditions: Overnight low around 2°F with chance of snow and freezing drizzle. Temperature rising slightly for women's start, to near 15 for men and 25 for the latest starters. Expect machine worked and packed powder with firm tracks. Some glazing may occur due to the mixed precipitation.

Glidewax: Apply LF Moly, scrape and brush. Women and Men starters then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad. Afternoon racers should apply HF Red, then scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Check at the TOKO tent for updated grip wax recommendation.

Structure: A fine linear structure covered by one pass with the fine-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
