

WAX RECOMMENDATION

Madison Winter Festival

Capital Square, Madison, WI

Sunday, February 15

Classic

9 A.M., Qualifiers, WI High School State Championships Sprint

1 P.M., SuperTour Classic Team Sprints

2:30 P.M., Finals, WI High School State Championships Sprint

Forecast/Conditions: Expect machine groomed and tilled conditions consisting of icy, granular, dirty corn snow. Snow will break down as it is skied in. Overnight low of 20. Temperature will steadily rising to 32 by mid afternoon with partly sunny skies.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue/HF Moly mixed 1:1, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper. Iron in Carbon Klister Base Green, let cool. Then apply Carbon Klister Viola. Morning races, cover with Carbon GripWax Viola if necessary. Afternoon races, cover klister with Carbon GripWax Red or Carbon Yellow for extra kick, if necessary.

Structure: A fine linear or universal structure covered by 1-2 pass with the fine-linear bit of the TOKO Structurite Tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
