

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **Madison Winter Festival**

Capital Square, Madison, WI

Saturday, February 14

2:30 P.M., SuperTour Skate Team Sprints

4:30 P.M., WI High School State Championships Relay

Forecast/Conditions: Expect machine groomed and tilled conditions consisting of icy, granular, dirty corn snow. Snow will break down as it is skied in. High temperature of the day around 32. Race temperature dropping into the 20s with overcast skies and possible snow flurries.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue/HF Moly mixed 1:1, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A fine linear or universal structure covered by 1-2 pass with the fine-linear bit of the TOKO Structurite Tool (before JetStream application) will best suit these conditions.

**Racing - Service**

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
