Snowflake Sprints

Snowflake Trails, Duluth, MN

Sunday, December 21

10 A.M.

1K freestyle sprints

Forecast/Conditions: Expect a firm base of nearly 12" covered with new snowfall that is forecast to begin around noon Saturday and continue through the race. Temperatures will drop from the mid-teens on Saturday to the low single digits Saturday evening. Expect race temperatures in the mid-single digits.

Glidewax: Apply LF Moly/LF Blue mixed 1:1, scrape and brush. Drip HF Blue on the ski, sprinkle Nordlite X-Cold Powder over it, and iron them in together. Scrape and brush well. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush, and buff with a thermopad.

Structure: A Cold Universal stonegrind will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
