

WAX RECOMMENDATION

Blue Hills Ascent

Blue Hills Trails in Bruce, WI

Saturday, January 2

11 A.M.

8K/16K Skate

Wave start

1 or 2 loops

Forecast/Conditions: Expect a firm track with new snow falling at cold temperatures during the two days prior to the event. This course is uphill for the first half and downhill for the remainder. Friday evening low of -10 F, warming to near zero F by race time. Slight wind and mostly sunny.

Glidewax: Apply LF Blue/LF Moly mixed 1:1, scrape and brush, then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A fine linear grind covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
