

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **Copper Loppet**

Michigan Tech Nordic Trails, Houghton, MI

Saturday, January 16

Noon

13K/26K Skate

Mass tart (1 or 2 laps)

Forecast/Conditions: Overnight low 23, rising to near 30 at start with partly cloudy skies and no precipitation expected. Expect machine worked and packed powder and relatively firm surface.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A fine linear grind covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application will best suit these conditions since the snow at this race venue is fine grained powder that is expected to stay relatively dry during the race.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
