

WAX RECOMMENDATION

Pre-Loppet

Theo Wirth Park, Minneapolis, MN

Saturday, January 9

10 A.M.

15K Skate

Mass start

Forecast/Conditions: Expect a near perfect race course consisting of a firm base and a couple of inches of new snow pack on the top. Friday evening lows -10F with temperature at the start slightly below zero F. Mostly sunny and a slight wind will drive wind chill to -15F to -20F.

Glidewax: Apply LF Blue/LF Moly mixed 1:1, scrape and brush. Then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A fine linear grind covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) after the HF Blue/X-cold application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
