

WAX RECOMMENDATION

Valley Spur Ski Bash

Valley Spur Ski Trails, Munising, MI

Saturday, January 9

10 A.M.

12K/24K Classic (1-2 laps), 24K Skate (2 laps)

Mass start

Forecast/Conditions: Snow showers likely with a low around 8F overnight. Race time temperature steady around 10F with chance for snow during the race. Expect medium-soft track.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 3 layers of Carbon GripWax White, corking between layers. Those requiring more grip should apply a short layer of Carbon Blue.

Structure: A fine linear structure covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
