

WAX RECOMMENDATION **TOKO**[®]

Michigan State HS Championships

Forestville Trailhead, Marquette, MI

Saturday, February 20

5K Pursuit. Skate interval start, Classic Gunderson start

10 A.M Girls Skate; 10:45 A.M. Boys Skate

3 P.M. Girls Classic; 4 P.M. Boys Classic

Forecast/Conditions: Overnight low near 12 with partly cloudy skies. Slightly increasing clouds with temperature rising to near 16 at start of Skate race and 26 at start of Classic race. Expect trail to be machine worked and soft to moderately firm, glazing in the afternoon.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, scrape and brush for classic race. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad. For skate race, substitute HF Red and JetStream Red.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2-3 layers of Carbon GripWax Red, corking between layers. Those requiring more kick should use Carbon GripWax Yellow.

Structure: A fine grind covered by one pass with the Blue TOKO Structurite tool (old fine linear wheel) before JetStream application will best suit the morning conditions. Cover with one pass with the Red TOKO Structurite tool for the afternoon conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
