

# WAX RECOMMENDATION

## MN High School Section 1

Valleywood Golf Course, Apple Valley, MN

Tuesday, February 2

Pursuit: 5K Classic/5K Skate

Classic: 10:30 A.M. Boys; 11:30 A.M. Girls

Skate: 1:30 P.M. Boys; 2:30 P.M. Girls

**Forecast/Conditions:** Expect a rock solid course (ground ice mixed with heavily transformed snow), and icy or glazed tracks. Monday night low in the mid-single digits with a 50 percent chance of snow. Temperature during morning races ranging from 10-12. Temperature during the afternoon races in the high teens. Mostly cloudy with a slight breeze from the east. Parking lot is an ice rink - be careful.

**Glidewax:** Apply LF Moly/LF Blue mixed 1:1, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brushing with a dedicated nylon polishing brush, and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper. Iron in Carbon BaseWax Green, cork smooth, let cool. Apply Viola Klister. If it snows Monday evening cover Klister with Toko Carbon white.

**Structure:** A fine linear grind covered by one pass with the Blue TOKO Structurite tool (old fine-linear wheel) before application of the HF Blue layer will best suit these conditions.

Racing - Service

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
