

WAX RECOMMENDATION

Michigan State HS Championships

Forestville Trailhead, Marquette, MI

Friday, February 19

1K Classic Sprint

2 P.M. Qualification

3 P.M. Heats

Forecast/Conditions: Overnight low near 11, rising to 29 at start of qualifications and remaining steady with clear skies. Recent new snow will be machine worked. Expect tracks to be glazed and soft to moderately firm and become highly transformed through heats.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2-3 layers of Carbon GripWax Yellow, corking between layers. Those requiring more kick should apply 1 layer of Carbon GripWax Silver underfoot.

Structure: A universal grind covered by one pass with the Red TOKO Structurite tool (old medium offset wheel) before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
