

WAX RECOMMENDATION **TOKO**[®]

SMU 10K

St. Mary's University, Winona, MN

Sunday January 27

10K Classic

Mass Start

Forecast/Conditions: Friday night low of 17F. Saturday high of 33F.

Glidewax: Apply LF Moly scrape and brush, then apply HF Red/HF Blue mixed 2:1, scrape and brush. Finish by rotocorking JetStream Moly, brushing with a dedicated nylon polishing brush, and finally, polish with a thermopad. HelX Cold would make an excellent alternative to JetStream.

Gripwax: Roughen kick zone with 180 grit sandpaper, and iron in TOKO base Green Binder. Cover with TOKO Carbon Gripwax Blue, or Violet for extra kick.

Structure: A fine universal structure will best suit these conditions.

Racing - Service

Check the Waxtip page at www.TokoUS.com before all of your races for the latest waxing information.

The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (HelX, JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red, Blue). Additionally, for those who do not have a rotocork (for applying JetStream), this step can be replaced by vigorously corking with a dedicated Plasto Cork at the expense of durability.
