

WAX RECOMMENDATION **TOKO**[®]

Sisu Ski Fest

ABR Ski Trails to Downtown Ironwood, MI

Saturday, January 14

9 A.M. CST 42K Wave Starts

11:30 A.M. CST 21K Wave Starts

Freestyle and Classic Divisions

<http://sisuskifest.com/>

Forecast/Conditions: Overnight low -2F rising to near zero F for the long course. Start temperature near 10 for the short course. Expecting heavy snow in the two days prior to fall in the mid-teens and be machine worked and packed yielding a semi-soft track.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Blue, corking between layers. Long course skiers should cover this with a single layer of Carbon GripWax Mint

Structure: A fine linear grind covered by one pass with the Blue Structurite tool before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
