

WAX RECOMMENDATION **TOKO**[®]

Noquemanon Ski Marathon

Ishpeming to Marquette, MI

Saturday, January 28

9 A.M. 50K Classic Mass Start - 9:00 am

9:55 A.M. 50K Freestyle, 10 minute waves

11:45 A.M. 25K Classic, 10 minute waves

12:30 P.M. 25k Freestyle, 10 minute waves

<http://www.noquemanon.com>

Forecast/Conditions: Mostly cloudy Friday night with a low around 20 and snow likely after 1 A.M. A 40 to 60 percent chance of snow showers Saturday with the morning temperature holding steady near 20 rising to 25 by mid-afternoon. Expect falling snow to be on top of fresh snow from earlier in the week, machine worked and packed with good coverage throughout the course.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 layers of Nordic GripWax Yellow, corking between layers. 50K entrants cover with 2-3 layers of Nordic GripWax Red.

Structure: A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
