On-site registration from 6 A.M. to 7 A.M.

2K loop on manmade snow

<http://hoigaards.com/articles/hoigaards-breadsmith-relays-pg141.htm>

**Forecast/Conditions:** Overnight low temperature and temperature at start of races in the low single digits. Course will be manmade snow - expect it to be abrasive.

**Glidewax:** Apply LF Moly, scrape and brush, then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

**Structure:** A fine linear grind covered by one pass with the Blue Structurite tool before JetStream application will best suit these conditions.

**Racing - Service**

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to [www.TokoVideos.com](http://www.TokoVideos.com).
