

# WAX RECOMMENDATION

## Lapham Loppet

Lapham Peak State Park, Delafield, WI

Saturday, January 21

11:15 A.M.

11K Skate

Wave start

<http://www.laphampeakfriends.org>

**Forecast/Conditions:** A few inches of new snow accumulation is expected on Friday afternoon and evening with temperatures falling to single digits F overnight. Expect temperature to rise into the low teens by race time Saturday. Expect a mix of firm and medium trail with some thin icy sections.

**Glidewax:** Apply a 1:1 mix of LF Moly/LF Blue, scrape and brush, then apply HF Blue, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** N/A

**Structure:** A cold grind followed by one pass with the Blue Structurite tool (before JetStream application) will best suit these conditions.

**Racing - Service**

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to [www.TokoVideos.com](http://www.TokoVideos.com).
