

WAX RECOMMENDATION

Preloppet

MOVED to Theodore Wirth Park, Minneapolis, MN

Saturday, January 7

9 A.M. Assorted Junior and Youth Races

10 A.M. 12K-15K (Six Laps) Skate and Classic

Forecast/Conditions: We expect a well-skied-in track with a mixture of manmade and natural snow. Friday evening temperature is expected to dip into the mid-20s with race time temperature in the upper 20s with partly sunny skies.

Glidewax: Apply LF Moly, scrape and brush, then apply a mix of HF Blue/HF Moly, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply layers of Nordic GripWax Yellow, corking between layers. Cover the Yellow with a thin layer of Nordic GripWax Red.

Structure: A universal grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
