

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## Grand View XC Ski Challenge

Wolverine Trails, Ironwood, MI

Sunday, December 11

9 A.M. CST 5K; 10 A.M. CST 10K

Classic 5K/10K, Interval Start

Single Lap Courses

<http://www.wolverinenordic.com/race.html>

**Forecast/Conditions:** Temperature will steady after dark near 20. Daytime skies will be partly cloudy with race time temperature ranging from 20-27. Expect machine worked firm track with a few thin spots.

**Glidewax:** Apply LF Moly, scrape and brush, then apply HF Blue/HF Red mixed 1:1, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Red, corking between layers.

**Structure:** A fine-linear grind covered by one pass with the Red Structurite tool before JetStream application will best suit these conditions.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to [www.TokoVideos.com](http://www.TokoVideos.com).
