Wolverine Trails, Ironwood, MI

Saturday, December 10

9 A.M. CST 5K; 10 A.M. CST 10K

Skate 5K/10K, Interval Start

Single Lap Courses

<http://www.wolverinenordic.com/race.html>

Forecast/Conditions: Temperature will fall after new snow early in the week. Overnight low 1F rising to race time temperature ranging from 5 to 15 with partly cloudy skies. Expect machine worked firm track with a few thin spots.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Blue, sprinkle on Nordlite Powder X-cold, iron in together, scrape and brush. Finish by rotocorking JetStream Blue, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: N/A

Structure: A fine linear grind covered by one pass with the Blue Structurite tool before JetStream application will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in. To see optimal application procedures for both Glidewax and Gripwax, go to www.TokoVideos.com.
