

WAX RECOMMENDATION **TOKO**[®]

CNGB Championships

Ethan Allen Firing Range, Jericho, VT

Friday, March 6

10 A.M.

15K Patrol Race

Interval start by team

Multiple laps

Forecast/Conditions: Overnight low near 25, high of 42.
Snow Thursday night and snow mixed with sleet during the race.
Snow temp will be warm throughout the race. Expect the track to be well groomed with softer new snow over worked-over older snow.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red and Yellow mixed 1:1, brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: A fine linear structure, covered by two passes with the fine-linear wheel of a TOKO structurite tool (before JetStream application) will best suit these conditions.

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
