

# WAX RECOMMENDATION

## Ski To The Clouds

Great Glen Trails, Gorham, NH

Sunday, March 8

10 A.M. Mass Start

Skate or Classic

10K Point to Point

1 hill with 2,200 vertical feet of climbing

Forecast/Conditions: Saturday night low 27 with a 50 percent chance of snow. Sunday high of 40 with a 50 percent chance of snow or rain showers. Cloudy. Snow temp will be high teens warming to low 30s by noon.

Glidewax: Iron on LF Moly, scrape and brush. Iron on HF Red/HF Yellow mixed 1:1, scrape and brush. Finish by rotocorking JetStream Yellow, brush with a dedicated nylon polishing brush and polish with a thermopad.

Gripwax: Roughen base with 150 grit sandpaper, iron in Carbon BaseWax Green, cork smooth, let cool. Then apply 2-3 layers of Carbon GripWax Red, corking between layers. If snow temp warms up, test Carbon Yellow if more kick is needed.

Structure: Use a fresh, wet snow grind or 2 passes of the coarse broken Structurite Tool after the HF wax and before applying the JetStream.

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
