

WAX RECOMMENDATION **TOKO**[®]

NENSA J2 FESTIVAL

Holderness School, Plymouth, NH

Friday, March 13

3:30 P.M.

5K Skate

Seeded wave start

Forecast/Conditions: Overnight low of 20, temp at start 34, sunny. Expect wet granular snow.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red, scrape and brush. Finish by rotocorking JetStream Red, brush with a dedicated nylon polishing brush and polish with a thermopad.

Structure: Warm grind skis with two passes of the Coarse Offset bit of a TOKO Structurite tool (before JetStream application) will best suit these conditions.

Racing - Service

Check the WaxTip page at www.TokoUS.com before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
