

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **NENSA J2 FESTIVAL**

Holderness School, Plymouth, NH

Sunday, March 15

10 A..M.

Relays: single gender, mixed gender, mixed medley

Forecast/Conditions: Overnight low 23, temp at early start 28, temp for late starters 40s. Sunny. Expect wet granular snow.

Glidewax: Apply LF Moly, scrape and brush, then apply HF Red/HF Yellow mixed 1:1, scrape and brush. Finish by rotocorking JetStream Yellow, brush with a dedicated nylon polishing brush and polish with a thermopad.

GripWax: Roughen the kick zone with 150 grit sandpaper. Apply a very thin layer of Carbon Klister Base Green. Early starters: apply Toko Sportline Klister Universal; later starters: Carbon Klister Orange; latest starters: Carbon Klister Silver.

Structure: Warm grind skis or two passes of the Coarse Offset bit of a TOKO Structurite tool (before JetStream application) will best suit these conditions.

**Racing - Service**

Check the WaxTip page at [www.TokoUS.com](http://www.TokoUS.com) before all of your races for the latest waxing information. The Toko Race Wax Tips offer racers precise waxing advice on how to make your skis perform optimally for a given event. For racers who don't have top end waxes available, skip the Fluorocarbon (JetStream) and substitute the LF or System 3 wax of the same color (Yellow, Red or Blue). For those who do not have a rotocork for applying JetStream, the next best thing is to iron it in.
